PROFILE

Technical artist and software developer with a background in computer science, animation, and production support. Experienced in developing automation tools, optimizing workflows, troubleshooting production issues, and supporting artists within fast-paced animation environments. Combines strong programming skills in Python and C++ with an understanding of animation and visual storytelling to create practical solutions that improve efficiency and reduce production complexity. Passionate about animation technology, pipeline development, and collaborating across departments to build tools that help artists work more effectively.

EMPLOYMENT HISTORY

Jul 2025 — Present	Lead Production Pipeline Technician, Sony Imageworks	Montreal
	• Trained and led a team of technicians to support production needs • Redesigned show workflows and procedures to eliminate manual steps and improve efficiency • Facilitated the creation of an automated I/O workflow for animation work done on an external server (<i>Sony Innovation award winner</i>) • Supported Producers and artists with day-to-day issues and troubleshooting • Created Documentation and training for new tools and workflows
